

PRIVATE LABEL AND CONTRACT MANUFACTURING

Formulate and Design Your Own Brand

Energique provides everything needed to create your own line of natural herbal remedies – from herbal procurement and processing to label design, final packaging, and shipping – all aspects can be handled by Energique. Even custom formulations can be prepared by Energique on your own label.

Select from a menu of standard label designs or upgrade to a customized label using Energique's art department and printing facilities. Regardless of your choice, Energique is dedicated to producing the high quality you desire for your private label offering.

There are a variety of options for minimum order quantities, combinations of herbs, container types, and packaging sizes. You can view a representative listing of the herbs available at www.energiqueherbal.com. This list is continuously updated to respond to customer requests, so please email us at info@energiqueherbal.com or call **1-800-869-8078** to speak to our Herbal Production Manager about your interests.

ENERGIQUE®

Making a Difference in People's Whole Health Every Day

Energique, Inc. provides natural remedies to health care practitioners from its hub in Woodbine, Iowa.

The Company manufactures and distributes more than 600 herbal extracts and 3,500 natural remedies to health care professionals across the United States. The product line includes herbals, homeopathics, essential oils, nutritional supplements, reactivated water concentrate, and books.

Homeopathy is a 200-year old form of natural medicine using microdoses of a substance to stimulate the body's own healing powers. Herbals are liquefied plants that are very high in nutrition and contain components that feed and balance the body. Essential oils are natural plant essences and are used primarily in aromatherapy to promote health and wellbeing. Nutritional supplements include vitamins, minerals, amino acids, essential fatty acids, glandulars, and enzymes that serve as fuel for the body.

Energique provides only the highest quality natural remedies. New products are field tested by independent doctors and clinics for safety and reliability of anticipated results. For products manufactured for Energique, the Company employs suppliers who use chemical-free environments and adhere to classical principles of homeopathic preparation.

Based on Energique's commitment to product excellence and customer service, the Company has established outstanding national name recognition and a rapidly growing customer base. The customer base primarily includes chiropractors, naturopathic doctors, traditional physicians, dentists, veterinarians, and massage therapists.

The Company has been in business since 1987 and its dedicated employees energetically provide outstanding customer service and produce natural remedies that make a difference in people's lives everyday.

HERBAL EXTRACTS

Specialized Extraction Process Means Outstanding Liquefied Herbals

Energique has produced the finest liquefied herbal extracts for over a decade. Practitioners report that the Company's full-spectrum extracts deliver superior medicinal benefits. Energique® herbals are available as single herbs, herbal combinations formulated for specific health conditions, and rainforest botanicals.

Energique secures its bulk herbs from ethical and reliable suppliers around the world and prefers to use Certified Organic raw materials whenever possible. In addition, Energique uses Spagyric processing to produce liquid herbals that are highly energized, concentrated, and effective. Although this method takes time and is complex, Energique believes it is the best method of extraction for producing the highest quality liquefied herbals.

The Spagyric method used at Energique distinguishes itself from other methods.

- The Spagyric method uses the whole plant. Alternative extraction methods (such as distillation, cold percolation, and agitation) dispose of the plant material after the extraction; they do not incorporate the oils, alkaloids, and mineral salts found in the plant matter. Herbals produced using these methods are not as concentrated and may not produce the same healing results as Spagyric method herbals.

- In its specialized process, Energique virtually eliminates exposure of the herbal extractions to oxygen, thereby reducing the amount of oxidation that may occur. Oxidation takes place when oxygen molecules come into contact with other substances causing molecular changes. Due to the low level of oxidation, Energique® herbal extracts more reliably retain the colors of the plant — vibrant reds, purples, greens, and golds.

- Lastly, Energique has perfected its Spagyric process through years of experience and dedication. This hard work has led to the production of herbals that have the highest levels of concentration of the entire plant. The extensive database of information from many years of production establishes specific criteria that enable replication of the highest quality standards with every batch of herbals produced.

HOMEOPATHICS

Extensive Inventory of Singles and Combinations

Energique has one of the largest inventories of single homeopathic remedies in the U.S. and is able to ship most orders the same day the order is placed. In addition, Energique has homeopathic combination formulas designed for specific health conditions.

Australian Bush and English Flower Essences are available in both 30c and 200c potencies from Energique. These are remedies that have a history of worldwide usage and have been used for many years to address emotional and other psychological imbalances.

In addition to its line of homeopathic cords, phenolics, and antigens, the Company also offers a unique line of specialty tonics, gels, sprays, and salves to address common ailments such as arthritis, inflammation, diaper rash, halitosis, general first aid conditions, and others.

ESSENTIAL OILS

Medicinal Quality for Health and Healing

Medicinal aromatherapy – the use of pungent essential oils from plants to treat ailments – is an increasingly popular practice for a wide range of conditions. It is practiced by professional aromatherapists in hospitals and clinics, and the demand for aromatherapy is growing rapidly.

Energique® essential oils are supplied by reputable distillers from around the world. The oils may be used medicinally with confidence as they are genuine, unaltered, uncut, and free from pesticides and synthetic substances. They have not been diluted or blended with carrier oils.

Energique offers more than 50 different essential oils in sizes as small as half-ounce. Several combination oils are also available.

NUTRITIONAL SUPPLEMENTS

Specialized Formulas for Whole Health Support

Energique's line of specialized nutritional supplements ranges from minerals and vitamins to enzyme formulas and glandular products.

The Company also offers a unique line of multi-vitamins in its Enervimin™ Series – 15 formulas using a base formula with key nutrients supporting specific health conditions such as arthritis, Chronic Fatigue Syndrome, premenstrual tension, recurring yeast infections, and others.
