

ENERGIQUE, INC.

IMMUNIQUE SILVER™
2 oz. personal size and 8 oz. refill bottles

IMMUNIQUE™ SILVER SPRAY
1 oz. travel size

IMMUNIQUE SILVER™ is:

- A patented, engineered, silver nano-particle dietary supplement.
- Prepared with 10 ppm (parts per million) silver in a purified water base.
- More effective, as shown in scientific testing, than other higher ppm silver products.
- A powerful anti-bacterial product that may help to strengthen the immune system and may aid in preventing harmful pathogens from thriving in the body.
- Colorless, tasteless, and odorless; and it may have the ability to help kill or deactivate bacteria, fungi, and viruses quickly.

IMMUNIQUE SILVER™ is backed by scientific testing at independent government certified labs, as well as numerous universities and government sponsored labs. There are no risks associated with daily usage as suggested.*

IMMUNIQUE SILVER™ engineered particles are quite different from products referred to as “colloidal silver.” When people use the phrase “colloidal silver,” they usually mean ionic silver, silver salts or silver nitrate in a gelatin matrix. **IMMUNIQUE SILVER™** does not contain any of these; instead, it contains engineered nano-size particles of metallic silver dispersed in pure water. Furthermore, this metallic silver (as opposed to ionic silver in other silver solutions) radiates energy in very narrow wavelengths between ultra-violet “A” and ultra-violet “B.” This radiation is harmful to pathogens, which is instrumental in the exceptional antimicrobial efficacy of **IMMUNIQUE SILVER™ Dietary Supplement**.

Safety studies were completed using this unique silver product, all with positive results.* In addition, several university studies showed great product effectiveness, with superior results in comparison tests against prescription antibiotics. This is an especially important point, as many modern antibiotics have become ineffective against both old and new types of resistant bacteria, and are no longer able to assist the body in its fight against these pathogens.
